

AUTOMATED Golf Tee Packaging Machine

FUNCTION: To package golf tees, ball markers, and divot tools. Products are presented using bowl feeders which orientate the products to be packaged. The final process includes gluing and dispensing.

RESULTS:

- ✔ **Reduced Human Error-** Products reloaded into vibratory bowls as sensors detect and indicate low levels.
- ✔ **Improved Safety-** Light curtains at each corner of the machine detect the presence of a foreign object and stops machinery immediately.
- ✔ **Better Ergonomics-** Designed with visibility in mind, all processes are performed at a low work height and within sight of the operator.
- ✔ **Increased Manufacturing Flexibility-** Provides a wide array of configurations. Different products and quantities can be assembled using the control panels simple setup.
