

ROBOTIC Injection Mold Press Tending

FUNCTION: This project integrated a mold press and automated assembly by removing heavy product from the machine. The tool changer is able to handle an array of product.

RESULTS:

- ✓ **Improved Safety/Ergonomics** – Heavy product now unloads from injection mold machine and is placed in a site that's easily accessible.
- ✓ **Reduced Cycle Time** – Robot is ready to service injection mold machine as soon as current cycle completes. The multi-gripper head works for multiple products.
