

Beverage Carbonation *PERFECTED*

We've got everything you need for beverage greatness on tap.

Now serving some of the Midwest's and nation's best restaurants, bars and breweries.

- More than 75 years serving the beverage carbonation industry
- Locally/family owned and operated
- Convenient locations
- Distribution and service leader in the upper Midwest

- Dedicated CO2 Solutions Specialists with expertise in cryogenics, beverage carbonation and dry ice
- Strong service focus, 24/7/365 emergency support
- Beverage grade gases, widest variety of state-of-the-art delivery system options and ColdZERO dry ice available

The Art & Savings of the PERFECT Pour

The proper carbonation system can make a big difference on profitability. You can waste thousands of dollars annually, simply by using a system that is not delivering the right blend of CO2 and nitrogen.

FOAMY BEER

Often happens when CO2 is used alone—resulting in excessive waste from beer being left in the keg.

- 8% waste
- 158.7 ounces lost/keg

THE PERFECT PINT

A 14-ounce pour made up of 13.5 ounces of beer and 0.5 ounce of beer within a ¾-inch head of foam.

FLAT BEER

The wrong mix, on ales and lagers, creates under-carbonated, flat beer—resulting in over-pouring.

- 5% waste
- 99.2 ounces lost/keg

HOW it works

- 1 Liquid CO2 is delivered in bulk to your facility.
- 2 Liquid CO2 is securely transferred through the outside wall of your facility into a bulk CO2 storage tank.
- 3 CO2 gas is dispensed from the bulk CO2 storage tank.

- Liquid CO2
- CO2 Gas
- CO2 Monitoring System
- Bulk Syrup

No Matter the Size or Type of Operation: We've Got You Covered

Our Bulk CO2 Storage and Delivery Systems fit any operation, volume, and brewing/beverage serving needs. Flexible, affordable, reliable and serviced by a team of beverage carbonation experts with decades of experience. Here are our most popular systems, and some add-ons to boost productivity and profits.

	EZ-FILL 3 CYLINDER SYSTEM			CARBO-MIZER 300	450	CARBO-MAX 750	VAPORMAN 125 KIT	PERMA-MAX 4400	6000HP	LARGE BULK CO2 TANKS		
DESCRIPTION	EZ-Fill 3-cylinder (bottle) system with backup in three cylinder sizes: 50#, 75#, 100#.			An affordable alternative to high-pressure cylinders that meets the demands of mid-volume applications.		A cost-effective solution to high-pressure cylinders for higher-volume applications.	Innovative system that offers the capacity and flow rates needed for high-volume users.	Compact, modular vaporizer that can be used with other high-flow CO2 tanks to provide warm CO2 to the point-of-use. Kit includes two vaporizers (one series, one parallel), manifold for connecting tanks, stand, hoses and all of the fittings. CO2 tanks not included.		Microbulk CO2 storage, with fast-fill technology for 3 times faster fill than standard Perma-Cyl models.	Large Bulk CO2 installs, including pad design.	
APPLICATIONS	Fast Food, C-Stores, Restaurants, Bars			Fast Food, C-Stores, Restaurants, Bars		Fast Food, C-Stores, Restaurants, Bars	Stadiums, Brew Pubs, Cineplexes, Microbreweries	Brew Pubs, Micro-Breweries		Brew Pubs, Micro-Breweries, Botanical Extraction, Special Effects	Brew Pubs, Micro-Breweries, Botanical Extraction, Special Effects

Made of high-grade stainless steel for food-grade compatibility and long service life, backed by an industry-leading 7 year vacuum warranty, and certified to meet NSF International Standards.

This nitrogen generator and blending system help maximize beer, wine, coffee and soda profits by improving quality and eliminating waste.

FEATURES

- Compatible with all Bulk CO2 Systems
- Compact size: 60" T x 15" W x 15" D
- Comes with or without a blender box
- Equipped with Vital Visual Leak Monitor to spot even small leaks in seconds (single, dual and high flow)
- Three models to meet varying usage
 - Basic 1200 ► 1,700 cu ft/month
 - Pro ► 3,000 cu ft/month
 - Max ► 7,300 cu ft/month
- Electrical certification listed and approved

BENEFITS

- No more changing or running out tanks
- No more handling heavy, high-pressure nitrogen cylinders for greater safety and convenience for you and your team
- Space efficiency due to small footprint
- Limitless nitrogen at one low monthly fee
- Never run out, always able to meet unexpected peaks in demand

HOW it works

- 1 The Nitro-Draught creates and stores nitrogen from ambient air at 99.8% purity.
- 2 It then blends it with CO2 at a Nitrogen/CO2 mix of 75%/25% or 70%/30% depending on the product being served.

The Nitro-Draught™
Makes, Stores & Blends 99.8% Pure, Beverage Grade Nitrogen

Vaporizers convert liquid CO2 into gas, allowing you to keep up with the draw you need. Shown here is an electric vaporizer. Available models can convert 150-250 lbs. of CO2 an hour.

Beverage Grade Gases
In the Cylinder Sizes You Need

We've been in the business of supplying Beverage Grade gases to bars and restaurants since our start in 1947. Gases include Oxygen, CO2, Nitrogen, Beer Gas and Argon. Delivered to you when you need it.

Check Out the Bulk CO2 ADVANTAGES

- ✓ Increased Convenience
- ✓ Better Quality
- ✓ Improved Safety
- ✓ Enhanced Efficiency & Savings
- ✓ Happy Customers

NO Hidden Costs of Cylinder CO2 due to:

POOR POURS

- No flat or foamy beer/soda
- No pouring beer/pop until it pours correctly (approximately 4 draws)
- Less product waste
- More satisfied customers

EMERGENCY SERVICE CALLS

- No down time
- No business opportunity losses
- Greater employee productivity
- More satisfied customers (again!)

CYLINDER HANDLING/CHANGE-OUTS

- Less employee risk of injury
- No cylinder switching during peak selling times (no missed sales)

ORDERING & BILLING HASSLES

- One simple invoice
- No ordering confusion
