

February 1, 2023 | Important Pricing Change Notice

To our Valued Customers:

As your partner, we are committed to providing you with exceptional quality products and service at the most competitive price possible. And our commitment remains unchanged.

This past year, we—along with the entire industry—have been challenged by skyrocketing costs for systems, equipment and transportation. Additionally, the raw material feedstock of CO₂ is becoming increasingly difficult and costly to secure. CO₂ demand for dry ice, shipping, and expanding cannabis industry (cannabinoid and terpene extraction) are rapidly growing without enough new capacity coming online to compensate.

In response to these mounting supply challenges, we have expanded our CO₂ sources to increase security and reliability of our supply and continue to invest in initiatives to further stabilize the supply chain.

Unfortunately, these efforts come with a price, and have significantly increased our costs—thus necessitating a change in our pricing.

Effective immediately or as contracts allow, we will be increasing:

- Facility and Rental Fees
- Beverage Carbonation Product Prices

A detailed list of these changes related to your account(s) is available upon request.

In closing, this is not something we want to do. However, it is necessary to ensure we can continue to service and supply you at the level your business requires, and you expect from us.

We are proud and honored to be your supply partner. We remain committed to your success, and truly appreciate your understanding and continued business.

Sincerely,

Your CO₂ Sales & Service Team
