

# HALLOWEEN EFFECTS WITH DRY ICE TIPS

## HOW TO MAKE JACK SMOKE

- 1 | Place a tall container inside your jack-o'-lantern.
- 2 | Fill it halfway with hot water.
- 3 | Drop a piece or two of dry ice into the glass.
- 4 | Place the top lid back on your jack-o'-lantern.

*You'll need to add more dry ice and cycle the water to keep your jack-o'-lantern smoking!*

### 1 Pound Dry Ice

(best to use a thick, rectangular chunk)

### ½ Gallon Hot Water

(add food coloring if you'd like, be sure to use a bowl that won't absorb color)

### Large Bowl

(at least 3 times as deep as chunk of dry ice)

### Small Fan

(on low helps move the fog over a larger area)

### Flashing Lights & Webs

(for added spooky effects)

NOTE: You'll need to cycle the water frequently to make your dry ice fog last. That's because as the amount of carbonation in the water increases, the amount of fog you can create decreases.

**KIDS: Check with your parents before doing this! Dry ice is EXTREMELY cold. Always wear gloves and goggles when handling & using. Use in a well-ventilated area ONLY.**
